## Summary

I'm Lulibo Mtampu, a passionate software developer with a diverse skill set that includes Java, JavaScript, HTML, CSS, SQL, and more. My journey into the world of technology has been marked by hands-on experience with real-time projects, where I thrive on solving problems and crafting innovative solutions.

I particularly enjoy working with databases, exploring the intricacies of data storage, and ensuring its security. My curiosity extends to cloud engineering, and I'm keen on delving into the fascinating realm of cybersecurity.

Beyond coding, my initial qualification in management and marketing has shaped my communication skills. This journey led me to take up leadership roles on campus, where I currently serve as a technical mentor and voluntarily lead a small community called Womethinkcode. These experiences have not only enhanced my leadership skills but also nurtured my passion for fostering a collaborative learning environment.

I find great interest in networking, understanding how computers communicate, and securing networks. It's a dynamic field that keeps me on my toes, always ready to explore new concepts and technologies.

In addition, I run a channel called WomenInTech, inspired by my commitment to being an example for other women aspiring to enter the tech space. I believe in breaking barriers and creating a supportive community for women in technology.

I believe in continuous learning and staying ahead of the curve. I'm open to exciting opportunities that allow me to expand my knowledge, contribute to meaningful projects, and connect with fellow professionals who share a similar passion for innovation.

## Experience

### Technical Mentor

WeThinkCode

Sep 2023 - Present (5 months)

### Bootcamp assistant

WeThinkCode

May 2023 - Present (9 months)

### Software Developer 1st year student

WeThinkCode

Sep 2022 - Present (1 year 5 months)

## Education

## **WeThinkCode**

Computer Software Engineering

Sep 2022 - Mar 2024

## **Northlink collage**

Marketing management N4, Marketing/Marketing Management, General

Jan 2022 - May 2022

## **Desmond mpilo tutu high**

Mathematics

2017 - 2019

## **Skills**

Passionate about Work • Writing • Resiliency • Problem Solving • Easily Adaptable • Technical Support • SQL • Python (Programming Language) • Java • Interpersonal Skills
